OpenJPA defines many configuration properties. Most of these properties are provided for advanced users who wish to customize OpenJPA's behavior; the majority of developers can omit them. The following properties apply to any OpenJPA backend, though the given descriptions are tailored to OpenJPA's default JDBC store.

5. OpenJPA Properties - home.apache.org

When this is the case, OpenJPA loads the default fetch group plus any fields in the specified set of additional fetch groups. You create fetch groups with the `org.apache.openjpa.persistence.FetchGroup` annotation. If your class only has one custom fetch group, you can place this annotation directly on the class declaration.
