### Biodiversity In India Vol 2

Free and open access to India's biodiversity information. A unique repository of information on India's biodiversity. The Portal aims to aggregate data through public participation and provide open and free access to biodiversity information. We welcome your participation and feedback.

### India Biodiversity Portal

History. Biodiversity is the result of 3.5 billion years of evolution. The origin of life has not been established by science, however, some evidence suggests that life may already have been well-established only a few hundred million years after the formation of the Earth. Until approximately 2.5 billion years ago, all life consisted of microorganisms – archaea, bacteria, and single-celled ...

### Biodiversity - Wikipedia

Biodiversity is commonly defined as the variety of life on Earth in all its forms, including the diversity of species, their genetic variations, and the interaction of these lifeforms. However, since the late 20th century loss of biodiversity caused by human behavior has caused more severe and longer-lasting impacts.

### Biodiversity loss - Wikipedia

biodiversity is well-managed such that its structure and functional relations are kept intact, then a more sustainable pathway for economic development could likely be attained. Biodiversity, literally, is the foundation upon which human civilization has been built. In addition to its intrinsic value, biodiversity

Bees play a crucial role in the complex ecosystems of our planet. Unfortunately, they are under threat. Human-driven change means that present species extinction rates for bees and other pollinators are 100 to 1,000 times higher than normal. The decline in bee numbers is a negative indicator for the future quality of human life and our planet at large. So, why are bees important to biodiversity?
