### Biology Growth Domestic Animals Scanes

The chicken (*Gallus domesticus*) is a domesticated junglefowl species, with attributes of wild species such as the grey and the Ceylon junglefowl that are originally from Southeastern Asia. Rooster or cock is a term for an adult male bird, and a younger male may be called a cockerel.A male that has been castrated is a capon.An adult female bird is called a hen and a sexually immature female is ...

### Chicken - Wikipedia

All modern humans are classified into the species *Homo sapiens*, coined by Carl Linnaeus in his 18th-century work *Systema Naturae*. The generic name "Homo" is a learned 18th-century derivation from Latin *homō*, which refers to humans of either sex. The word human can refer to all members of the *Homo* genus, although in common usage it generally just refers to *Homo sapiens*, the only extant species.

### Human - Wikipedia

This study was conducted to assess management practices and constraints of small-scale commercial poultry farms in and around Debre Markos, and performance evaluation of Sasso C44 broilers fed diets containing graded levels of dried blood-rumen
