Channel Tunnel - Wikipedia

The present paper approaches the problem of safety and health in work at European level. The paper aims to highlight the perception of the Romanian employees in Romania and abroad on the main aspects regarding the safety and health at work (information, training, quality of the working environment, occupational risks, satisfaction related to the working conditions).

Aspects of the Safety and Health at the Workplace ...

Abstract. The paper is a critical review of the operation of the Channel Tunnel Safety Authority (CTSA) before and since the inauguration of the tunnel system. It considers four of its major decisions in relation to the tunnel fire hazard: (1) spacing of the cross-passages that link the running tunnels to the service tunnel and form the escape routes for people caught in a fire; (2) construction of shuttle carrier wagons for heavy goods vehicles involved in the severe tunnel fire of November ...
