experience in their own areas of expertise within book service, and indeed covering all areas of the book industry. Our professional team of representatives and agents provide a complete sales service supported by our in-house marketing and promotions team.

### **Osteomyelitis Of The Jaws**

Osteomyelitis of the jaws is osteomyelitis (which is infection and inflammation of the bone marrow, sometimes abbreviated to OM) which occurs in the bones of the jaws (i.e. maxilla or the mandible). Historically, osteomyelitis of the jaws was a common complication of odontogenic infection (infections of the teeth).

### **Osteomyelitis of the jaws - Wikipedia**

Osteomyelitis of the jaws usually is caused by odontogenic infection, although other etiologic factors include traumatic jaw fracture, vascular insufficiency, necrotizing ulcerative gingivitis,

Osteomyelitis Osteomyelitis is an infection of the bone, a rare but serious condition. Bones can become infected in a number of ways: Infection in one part of the body may spread through the...

### **Osteomyelitis: Symptoms, Causes, and Treatment**

Osteomyelitis in the jaw can happen in the jaw bone which is not in direct contact with a tooth. This kind of infection may start on the root of a dead tooth, but in osteomyelitis, it spreads away from the tooth to infect the neighbouring bone mass. This is the most common cause of jawbone osteomyelitis.
